Dear Auditor Hook,

Thank you in advance for your time. I'm writing on behalf of People for the Ethical Treatment of Animals (PETA) and our more than 6.5 million members and supporters. **Based on the information below, we request that your office audit the performance of the University of Maryland Baltimore (UMB) and College Park (UMCP) regarding the apparent waste of state resources allocated to support animal research activities.**

In FY 2019, UMB and UMCP received more than \$143 million<sup>1</sup> in state appropriations, part of which may have been used to support animal experimentation activities. During the COVID-19 pandemic, UMB and UMCP issued directives that likely led to the destruction of hundreds of animals they deemed extraneous, noncritical, or nonessential, or described using similar terminology.

UMB asked its experimenters to consider "reduc[ing] colony size by euthanizing excess animals" and "evaluating all animals for status, meaning 'high priority', 'low priority' and 'euthanize first.'"<sup>2</sup> UMCP informed its experimenters that "all basic and animal research experimentation requiring a physical presence at UMD will cease, unless specifically exempted by Deans/VPR."<sup>3</sup>

That activities supporting unnecessary, nonessential, noncritical, or extraneous animal experimentation are taking place at UMB and UMCP at an apparent annual cost of millions of dollars, some of which may have been funded by the state, is the height of absurdity and wastefulness, and it is well within the mandate of your office to investigate this matter and rectify it.

**We respectfully urge that your office investigate and assess the following information as it relates to the apparent waste of state funds by UMB and UMCP on activities supporting experiments—and/or on the animals used in them—that the schools deemed extraneous during the COVID-19 pandemic:**

- 1) Any and all state-funded activities supporting animal experiments that UMB and UMCP suspended and/or ended in accordance with its response to COVID-19, such that the experiments may be categorized as unnecessary, extraneous, noncritical, or nonessential or described using similar terminology
- 2) The number and species of any and all animals used in state-funded research activities at UMB and UMCP covered by item number 1 above
- 3) The number and species of any and all animals used in state-funded experiments who are categorized by UMB and UMCP as unnecessary, extraneous, noncritical, or nonessential or described using similar terminology
- 4) The endpoint disposition (to include—but not be limited to—euthanasia, cull, sacrifice, killing, destruction, disposal, and/or reduction in cage census) of any and all animals used in state-funded experiments at UMB and UMCP covered by item number 1 above
- 5) The endpoint disposition (to include—but not be limited to—euthanasia, cull, sacrifice, killing, destruction, disposal, and/or reduction in cage census) of any and all animals at UMB and UMCP used in experiments receiving state funds who are themselves covered by item number 3 above
- 6) State funds used to support experiments at UMB and UMCP covered by item number 1 above, to include—but not be limited to—the purchase, breeding, housing, feeding, maintenance, and/or veterinary care of any and all animals used in these experiments, and/or the payment of salaries and/or wages of personnel who attended to any and all animals used in these experiments
- 7) State funds used to purchase, breed, house, feed, maintain, or administer veterinary care to any and all animals—or pay the salaries and/or wages of personnel who attended to them—at UMB and UMCP covered by item number 3 above

Furthermore, the decision by UMB and UMCP to keep purchasing, breeding, housing, feeding, and maintaining animals to be used in state-funded research activities—where the experiments or animals themselves are deemed unnecessary, nonessential, noncritical, or extraneous or described using similar terminology—is at odds with the U.S. Public Health Service's *Guide for the Care and Use of Animals*, which includes the principle of "consideration of alternatives (in vitro systems, computer simulations, and/or mathematical models) to reduce or replace

the use of animals,"<sup>4</sup> and with the *U.S. Government Principles for the Utilization and Care of Vertebrate Animals Used in Testing, Research, and Training* (1985), which state, "The animals selected for a procedure should be of an appropriate species and quality and the minimum number required to obtain valid results."<sup>5</sup>

When UMB and UMCP buy, breed, trap, and/or use animals who at any time—not just during the COVID-19 pandemic—can be deemed unnecessary, extraneous, nonessential, or noncritical or described using similar terminology, they are squandering limited public resources and flouting the bedrock "3Rs" principles of reducing, replacing, and refining the use of animals in experimentation that are enshrined in government regulations and policies.

Moreover, the Congressional Research Service has found that during the COVID-19 pandemic, "[s]uspending research may result in additional costs for activities such as animal care," and "[r]estarting research, when conditions permit, may also incur costs for staff time and supplies to . . . reestablish laboratory animal populations."<sup>6</sup> Maryland taxpayers should not be responsible for incurring additional costs to re-establish research activities involving animals, since UMB and UMCP deemed many of them not to be essential to the experiments and because resuming these activities and repopulating animals in laboratories at taxpayers' expense would appear to violate federal regulations and policies that mandate the minimization of animal use in experiments.

**Based on this information, we urge your office to assess the use of public money, personnel, property, equipment, and space by UMB and UMCP for activities supporting experiments on animals that they deem unnecessary, extraneous, nonessential, or noncritical or describe using similar terminology. If wastefulness is corroborated, we request that you take all corrective actions to ensure that current state-funded research activities involving such animals are permanently terminated, that new state-funded research activities that include such animals are no longer approved, and that the breeding and acquisition of such animals for state-funded research activities are prohibited.**

You can contact me at [ShalinG@peta.org](mailto:ShalinG@peta.org). We look forward to your reply regarding this important matter. Thank you.

Sincerely yours,

---
