Are there any ways we could make our campus more bird safe during the peak of fall migration? Draping fabric over larger south facing windows, turning off lights of unused campus buildings, other suggestions?

Yes, stop  
experimenting  
on us!

Louisiana State

University experimenter

**Christine Lattin** tweeted

her sadness that birds

are flying into glass windows

and dying on campus. Yet every year,

she hypocritically traps, torments, and

kills dozens of wild birds in experiments

that don't help birds or humans.
