BAILWICK RANCH INC

Type: ROUTINE INSPECTION

Date: May-29-2013

### 2.40 (b) (3)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Daily observation of all animals to assess their health and well-being; Provided, however, That daily observation of animals may be accomplished by someone other than the attending veterinarian; and Provided, further, That a mechanism of direct and frequent communication is required so that timely and accurate information on problems of animal health, behavior, and well-being is conveyed to the attending veterinarian.

1. While conducting this inspection it was noted that one of the ring tailed lemurs was injured. This lemur was non weight bearing on its back, left leg. There was also a wound to its right thigh. The wound on the thigh appeared to be new evident by the fresh blood that was around the area. This animal was pulled from the enclosure, while we were present, and placed into a Vari kennel. The attending veterinary was called. This animals condition will need to be evaluated by the attending veterinarian.

\*\*\* To Be Corrected By: May 31, 2013

2. While conducting this inspection we were informed that their elderly, female, chimp had passed way in April. In discussing this situation with the owners it was determined that this chimp had been showing behavioral changes for a few days before the final episode. Once this animal was obviously ill the veterinary was called. However, the animal passed before the vet was able to make it to the facility. Frequent communication is required so that timely and accurate information on problems of animal health and behavior is conveyed to the attending veterinarian. Should other animals show behavioral changes the attending veterinarian will need to be called in a more timely manner.

\*\*\*To Be Corrected By: From this day forward

### 2.75 (b) (1)

#### RECORDS: DEALERS AND EXHIBITORS.

Every exhibitor shall make, keep, and maintain records or forms which fully and correctly disclose the following information concerning animals other than dogs and cats, purchased or otherwise acquired, owned, held, leased, or otherwise in his or her possession or under his or her control, or which is transported, sold, euthanized, or otherwise disposed of by that exhibitor. The records shall include any

## Inspection Report

offspring born of any animal while in his or her possession or under his or her control.

- (i) The name and address of the person from whom the animals were purchased or otherwise acquired;
- (ii) The USDA license or registration number of the person if he or she is licensed or registered under the Act;
- (iii) The vehicle license number and State, and the driver's license number (or photographic identification card for nondrivers issued by a State) and State of the person, if he or she is not licensed or registered under the Act;
- (iv) The name and address of the person to whom an animal was sold or given;
- (v) The date of purchase, acquisition, sale, or disposal of the animal(s);
- (vi) The species of the animal(s)

While reviewing the records it was noted that the newly acquired pot belly pig and calf were not in the records. The information regarding the goats was present. However, the Drivers Lic # and Vehicle Plate #'s were not present. All information needs to be documented on all animal transactions.

\*\*\*To Be Corrected By: June 10, 2013

### 3.80 (a) (2)

#### PRIMARY ENCLOSURES.

Primary enclosures must be designed and constructed of suitable materials so that they are structurally sound for the species of nonhuman primates contained in them. They must be kept in good repair.

- (2) Primary enclosures must be constructed and maintained so that they:
  - (i) Have no sharp points or edges that could injure the nonhuman primates;
  - (ii) Protect the nonhuman primates from injury

1. The ring tail lemur enclosure has a metal framed platform that is under a wooden den box. The left side of the metal platform has broken apart. The platform is now loose and sagging. To ensure the integrity platform, and the safety of the den box, this will need to be addressed.

\*\*\*To Be Corrected By: June 8, 2013

2. There was an extension cord that ran along the outside of the lemur pen. This cord was used to power the heat lamp in the lemur's den box. However, the cord had been pulled taut and was right up against the primary fencing. The lemurs had direct access to this electrical extension cord that was obviously "live". To ensure the safety of the lemurs this cord will need to be addressed.

\*\*\*To Be Corrected By: May 31, 2013 This was corrected before we left the premise

### 3.125 (a)

#### FACILITIES, GENERAL.

The facility must be constructed of such material and of such strength as appropriate for the animals involved. The indoor and outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

## Inspection Report

1. The tiger's wood den / shelter box is in need of attention. The front panel of the shelter box had sections of peeling paint. To ensure the safety of this tiger, these areas will need to be addressed.

\*\*\* To Be Corrected By: June 30, 2013

2. The back, right corner of the camel pen is also in need of attention. The chain link fence has detached from a few of the staples that held the fence to the support post. There is now a gap between the chain link fence and the post along the bottom half of the pole. To ensure the integrity of the fence this area will need to be addressed.

\*\*\*To Be Corrected By: June 8, 2013

3. The roof of the calf shelter is in need of attention. The wood shingles have begun to deteriorate and are now jagged. To ensure that this roof is in good condition it will need to be addressed.

\*\*\* To Be Corrected By: June 30, 2013

An exit briefing was conducted with the licensee.
