

“No Animals Were Harmed?” *Really, One Direction?*

One Direction made a wrong turn when they used a chimpanzee in their recent music video.

Most people don't know that wild animals used in film and television are routinely subjected to abusive training methods, such as beatings, electric shocks, psychological torment, and food deprivation. After they become unmanageable or are no longer profitable to their owners, they are typically discarded, like Chubbs, the chimpanzee shown here. Chubbs appeared in Tim Burton's *Planet of the Apes* and *The Chimp Channel* TV series, but he was last seen in a squalid roadside zoo, living off dog food and produce covered with maggots.

Please don't ever use wild animals in your projects or support entertainment that exploits them.
