

Like You, Only Different

Animal-Friendly
Alphabet Flashcards

TeachKind **PeTAkids**

Aa

Ants help their friends.

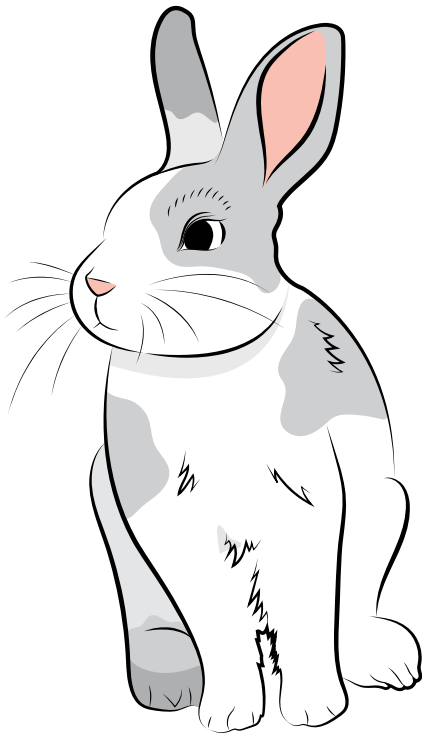

Never step on ants. Instead, watch them as they
carry food back to their home.

TeachKind **PeTAkids**

Bb

Bunnies run from danger.

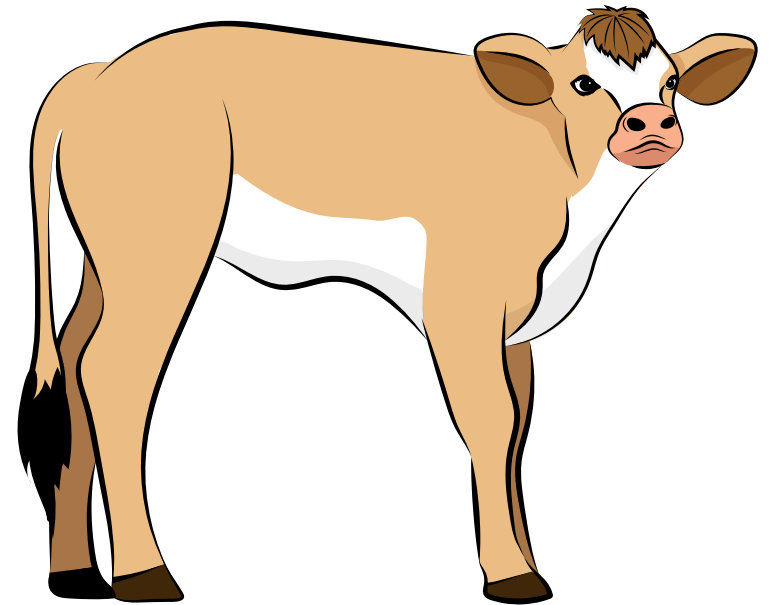

Some scientists do experiments on bunnies. Choose soap, shampoo, and other products that aren't tested on animals.

Teach*Kind* PeTA*kids*

Cc

Calves drink their mother's milk.

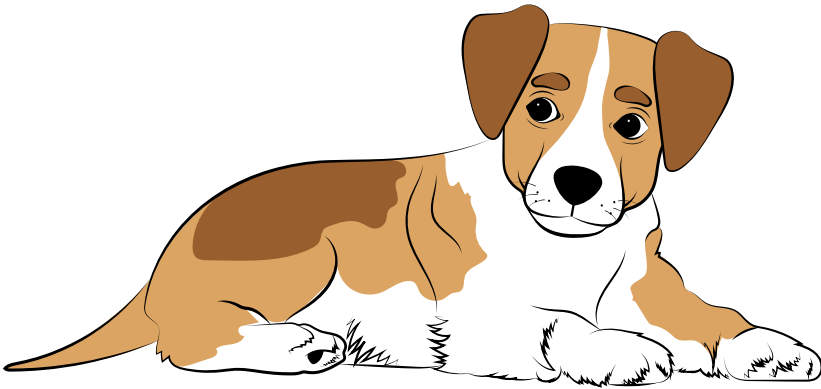

Cow's milk is meant for calves—not us. Enjoy dairy-free foods and drinks instead.

Teach*Kind* PeTA*kids*

Dd

Dogs like to curl up
in their beds.

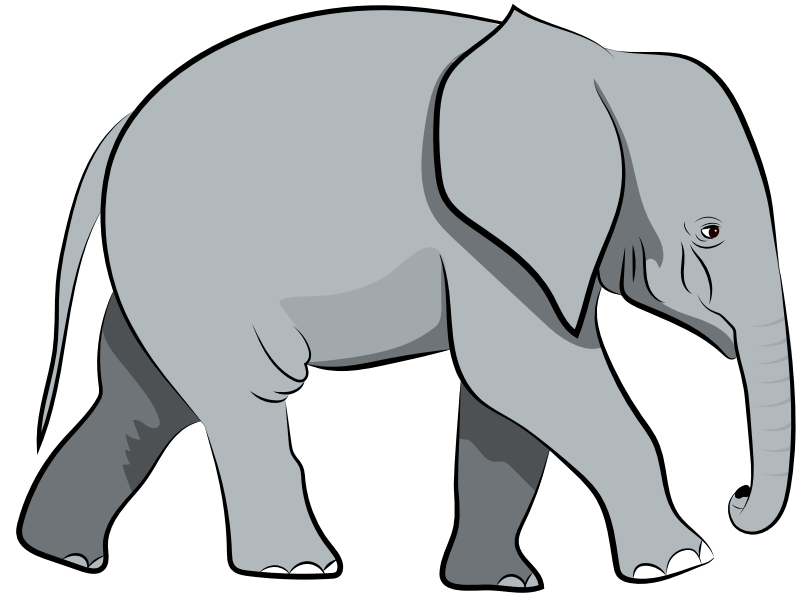

Dogs need to live indoors with their human families.
Make sure your dog has a soft, warm bed to sleep in at night.

Teach*Kind* PeTA*kids*

Ee

Elephants use tools.

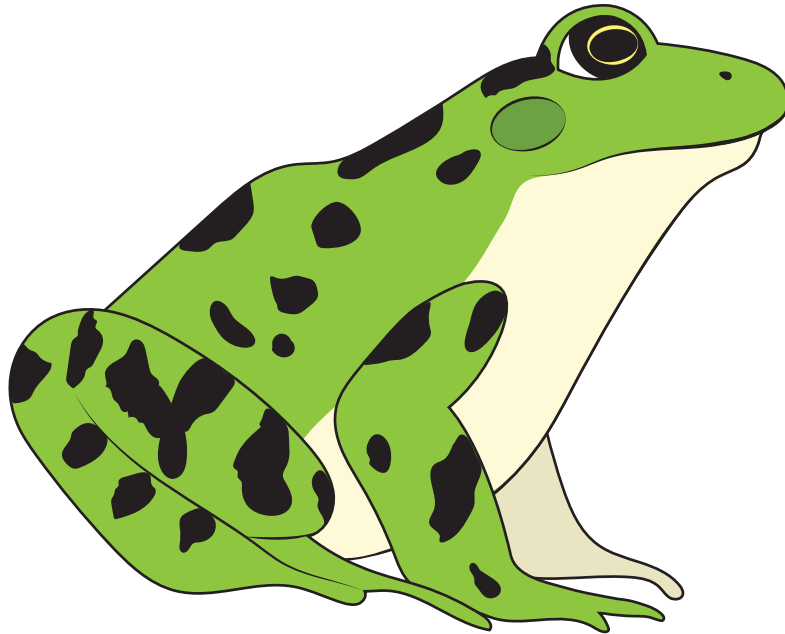

Elephants are smart and have big brains.
Don't visit roadside zoos or circuses with elephants.

Teach*Kind* PeTA*kids*

Ff

Frogs watch over
their babies.

Frogs have feelings and shouldn't be used for dissection.
Use cool computer programs to study biology instead.

Teach*Kind* PeTA*kids*

Gg

Gorillas eat lots of plants.

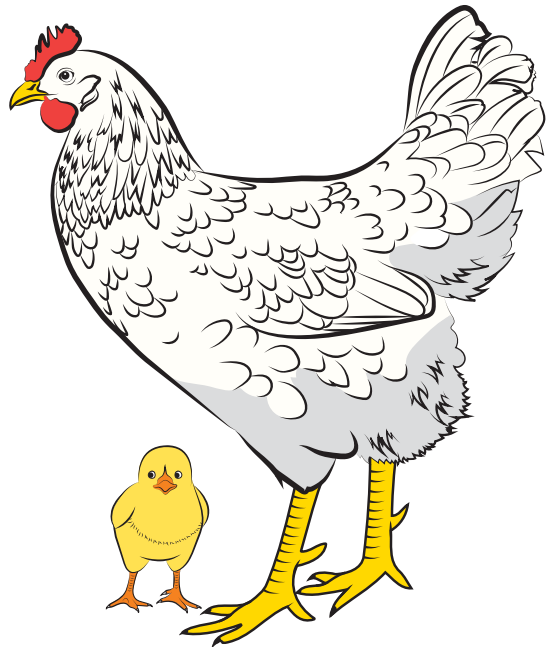

Gorillas are big and strong, and they eat healthy
vegan foods. Watch them on TV or read about them
in books—don't go to places with gorillas in cages.

Teach*Kind* PeTA*kids*

Hh

Hens protect their babies from the rain.

Hens and all chickens want to play and be free. Instead of eating chicken, try vegan nuggets, tofu, or a new vegetable.

Teach*Kind* PeTA*kids*

Ii

Iguanas are excellent swimmers.

Iguanas are happiest when they live in nature—so never buy them. If you want an animal companion, adopt a dog or cat from a shelter.

Teach*Kind* PeTA*kids*

Jj

Jellyfish are colorful.

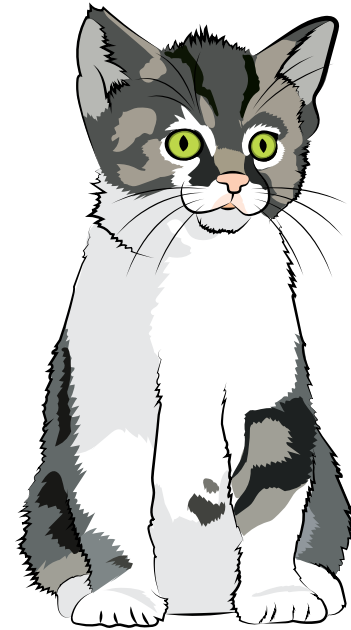

Jellyfish sometimes get caught and die in fishing nets. Ask your family not to buy fish unless it's vegan.

Teach*Kind* PeTA*kids*

Kk

Kittens like to play with their toys.

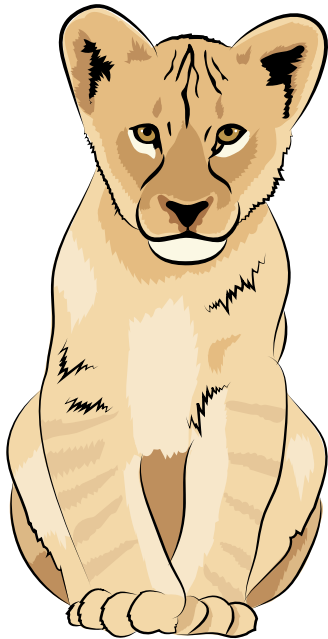

Kittens and all cats can get hurt or sick when they live outside. They should live indoors with their human families, where it's safe and cozy.

Teach*Kind* PeTA*kids*

Ll

Lion cubs learn from their mothers.

Lions like to run, roam, and be with their families. In the circus, they can't do these things, so don't go.

TeachKind PeTAkids

Mm

Minks like to explore new places.

Minks are excellent climbers and swimmers, but when they're stuck in cages on fur farms, they can't do anything. Don't wear clothes made out of fur.

TeachKind PeTAkids

Nn

Narwhals have long tusks.

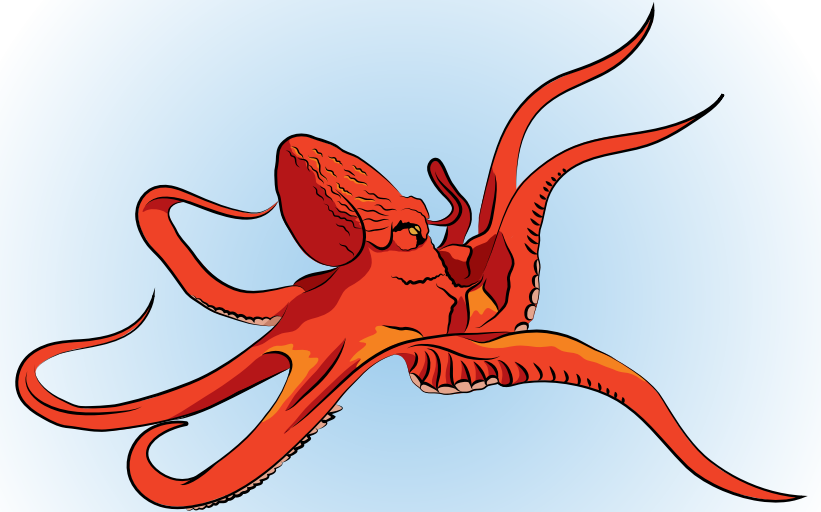

If we don't take care of the planet, narwhals could be in danger. You can help save them by going vegan and making the world a healthier place.

Teach*Kind* PeTA*kids*

Oo

Octopuses can change the color of their skin.

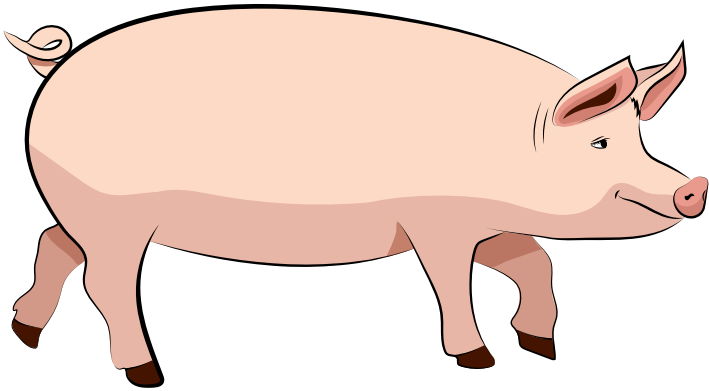

Octopuses belong in nature, not in small tanks. Learn about octopuses on the internet instead of visiting marine parks.

Teach*Kind* PeTA*kids*

Pp

Mother **pigs** sing to
their babies.

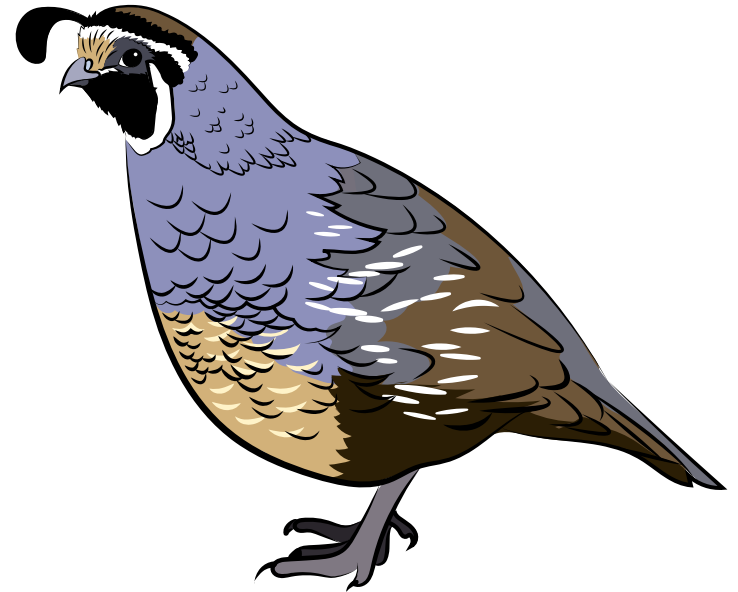

Pigs love to play, explore, and snuggle.
Make them happy by not eating bacon, ham,
or hot dogs unless they're vegan.

Teach*Kind* PeTA*kids*

Qq

Quails snuggle to
keep warm.

Quails have beautiful feathers. Some people eat quails
and their eggs, but they don't want to be eaten.

Teach*Kind* PeTA*kids*

Rr

Rats are very clean.

Even though rats are gentle and enjoy cuddling, some companies test products on them. Ask your family not to buy from companies that test on animals.

Teach*Kind* PeTA*kids*

Ss

Squirrels often save their food for later.

Sometimes baby squirrels get separated from their mothers. If you find one, tell a grown-up to call a wildlife rescuer right away.

Teach*Kind* PeTA*kids*

Tt

Tigers like to splash
in the water.

Some roadside zoos let people have their picture taken with baby tigers who were taken away from their mothers. Don't go to places that use animals to make money.

Teach*Kind* PeTA*kids*

Uu

Umbrellabirds help spread
seeds throughout the rainforest.

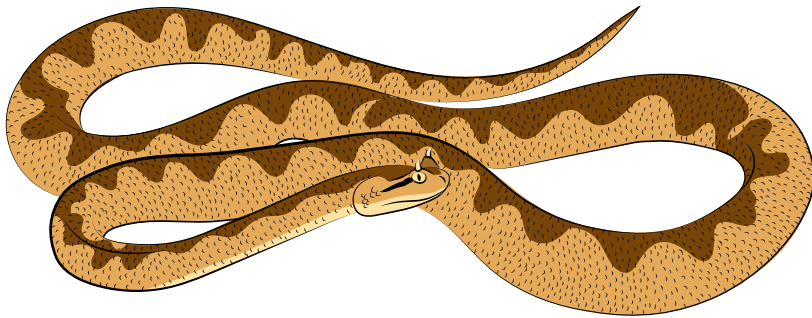

Umbrellabirds are in danger of losing their natural habitat. You can help them by going vegan because growing vegan food uses less land.

Teach*Kind* PeTA*kids*

Vv

Vipers lie in the sunshine.

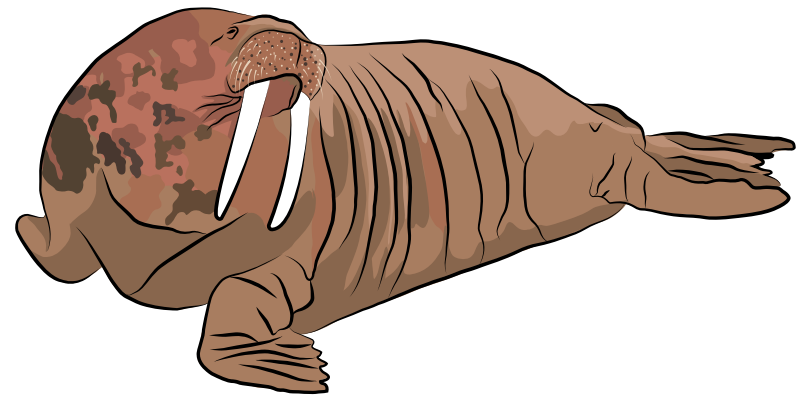

Vipers are poisonous snakes. They don't make good animal companions—or purses or boots, either. Let snakes live—never buy them from pet stores or wear their skin as clothing.

Teach*Kind* PeTA*kids*

Ww

Walruses are gentle giants.

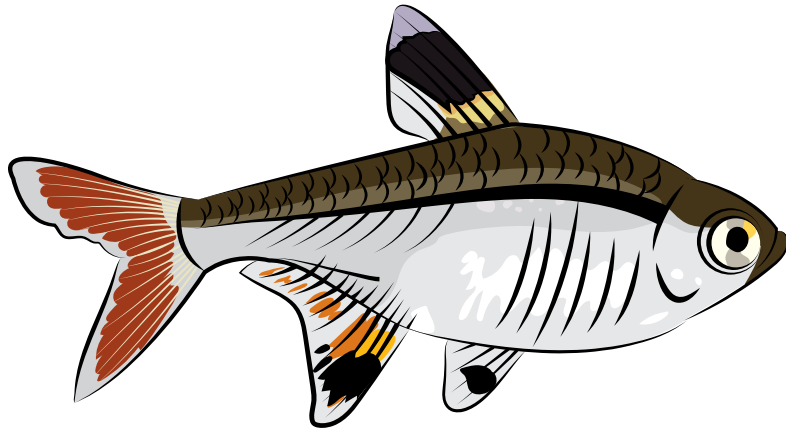

In nature, walruses live in large groups, but in marine parks, they're kept in small tanks with nothing to do. Never visit places that keep animals in tanks.

Teach*Kind* PeTA*kids*

Xx

X-ray fish have
see-through skin.

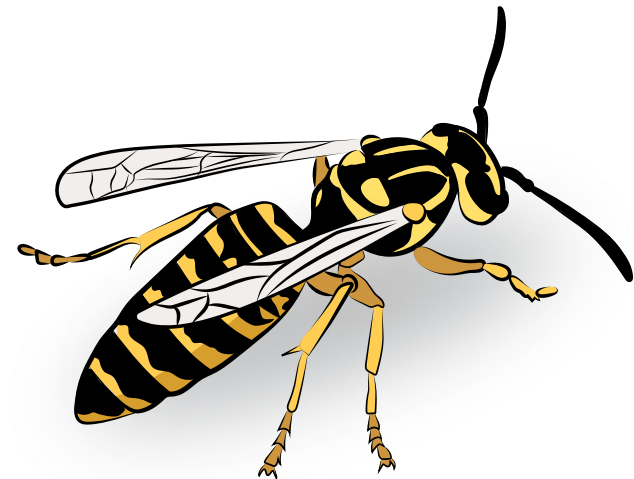

X-ray fish are often kept in aquariums. Imagine having to live in a small glass tank for the rest of your life! Never buy fish from pet stores.

TeachKind PeTAkids

Yy

Yellow jackets have a
special language to
communicate with each other.

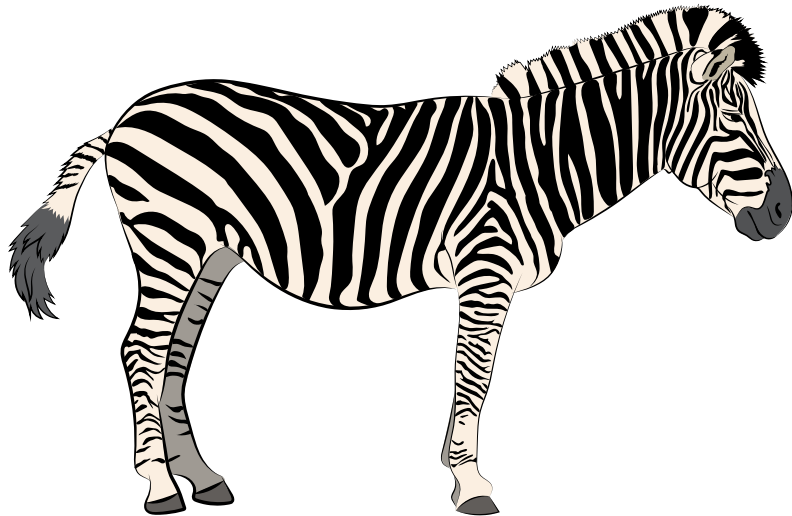

Yellow jackets are also called “wasps,” and they use special chemicals to tell others where food or danger is. Stay away from their nests and they’ll leave you alone.

TeachKind PeTAkids

Zz

Zebras are friendly
and like to eat grass.

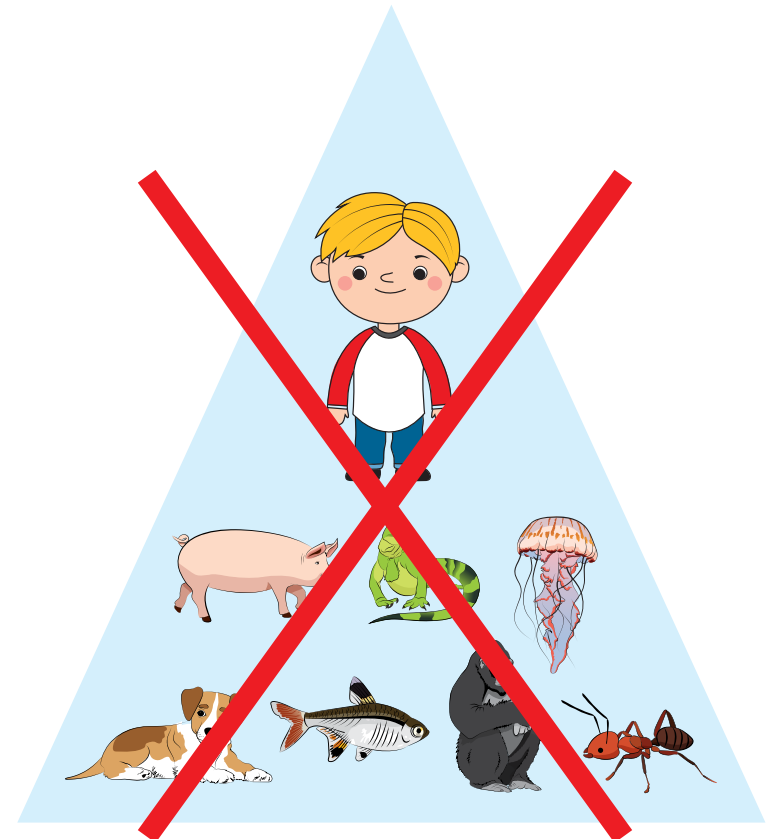

Zebras belong on the plains of Africa, not in cages.
Write to circuses and roadside zoos and
tell them to stop using zebras to make money.

TeachKind PeTAkids

Speciesism

Speciesism is the harmful idea that
humans are more important than other
animals, but we know that it's not true.
All animals deserve kindness and respect.

TeachKind PeTAkids

Species

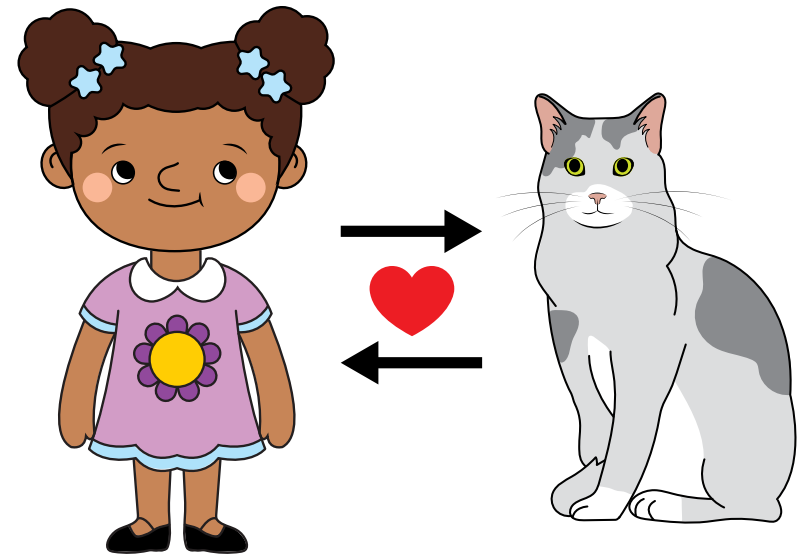

A species is a group of animals who have a lot in common and form families. All animals, including humans, belong to their own **species**. We don't look and act exactly like other animals, but we're all the same in the ways that really matter. All animals have feelings, love their families, and want to live.

TeachKind PeTAkids

Empathy

Empathy is understanding how someone else feels. You can empathize with animals by imagining how they feel and trying not to hurt them.

TeachKind PeTAkids

Vegan

Vegan means either someone who doesn't eat, wear, or use products made from animals or something that doesn't come from an animal.
