

Establishment Number	Establishment Name	Inspection Date	MOI Description
P425+V425	Northern Pride, Inc.	11/8/2021	<p>At about 7:15 A.M. when I was walking into p425a I had a conversation with REDACTED in the parking lot. I wanted to ask him about the situation from Friday where a semi-load of birds was flipped on its side. REDACTED said that they started removing live and dead birds when it arrived around 6 P.M. on Friday. He estimated that about 2/3 of the birds on the trailer were DOA. The birds were then placed inside the trailer wash area with the garage doors down to shelter the birds from the weather during the weekend. At some point, the trailer with the remaining birds were taken out and the covers were placed on it. REDACTED stated that it was REDACTED's decision last night to slaughter the birds at the end of the day. REDACTED told me today that they plan to slaughter the remaining birds at the end of the day. When I went to get a quick glance to gauge antemortem for those birds I saw in the first cage I looked in another dead bird.</p>
