Consumers are choosing compassion today more than ever. They want to know that no animals were harmed to create the items they wear. The suppliers in this guide can provide you with innovative vegan alternatives to animal-derived materials.

VEGAN FUR

Faux fur looks and feels just like animal fur and enables designers to choose the exact plushness, thickness, and hue that they desire. Just a few of today’s many wonderful examples can be found in the collections of Stella McCartney, Shrimps, Ralph Lauren, and Calvin Klein, all of which refuse to use fur.

**DONGLIM**
This company makes both traditional faux furs and innovative ones.
Composition: Varies (Please inquire directly.)

cbolick@unifi.com
www.unifi.com

**FELT**
High-quality vegan felt can cushion and retain its structure under pressure, and it’s an ideal material for crafters seeking a thick felt.

**Aetna Felt**
Since 1934, Aetna Felt has been a leading manufacturer and fabricator of industrial and consumer felt products. Its Eco-fi felt is a high-quality, plant-based alternative to traditional felt.
Composition: 100% post-consumer recycled plastic bottles
info@aetnafelt.com
www.aetnafelt.com
With all these options, there’s no reason to sell animal-derived materials. If you’d like your company to use the “PETA-Approved Vegan” logo, check out our informational page.

If your company wants to make sure a supplier or manufacturer is holding true to vegan standards, this laboratory is a good option to test your product:

**Centro Controllo Tessile – Vismederi Textyle**
Websites:
