Subject: Live animal models

Gentlemen:

The issue of live animal models will not go away.
While we have removed this from the medical school curriculum, it remains in GME.
So far we have not had a reporter be perceptive enough to press the question about GME, but it is coming.

And our response will be viewed as being less than forthcoming about the use of animals on the Chattanooga campus.

Discovering that we are still using animals, even though in GME, will be very damaging to the College of Medicine and our credibility.

I need some direction on this.
