

Establishment Number	Establishment Name	Inspection Date	NR Description
M47494+P47494+V47494	South 40 Farms, LLC	10/7/2021	<p>At approximately 1015 hours on 10-7-21 while verifying HATS Category VIII – Stunning Effectiveness, IPP observed the following noncompliance on a beef heifer:</p> <p>The animal was put into the restrainer and the head catch. The first stun attempt with the captive bolt did not render the animal immediately unconscious. The animal vocalized and remained standing. The stunning operator immediately grabbed another captive bolt that was already loaded.</p> <p>A second stun attempt also did not render the animal unconscious. IPP observed blinking of the eyes and the animal remained standing. A third stun attempt was again immediately performed after reloading the captive bolt that rendered the animal unconscious and it dropped to the floor.</p> <p>A fourth stun was applied after the animal was down as a safety stun.</p> <p>The restrainer was tagged immediately with U.S. Reject tag number B-45639489. Owner: Mr. John Roswech was present during the incident and was informed that the establishment had failed to meet the regulatory requirements of 9 CFR 313.15(a)(1), a Non-Compliance Record would be issued, and the District Office would be contacted for further guidance.</p> <p>On post-mortem examination there is one hole directly within the eye/ear cross pattern. A second hole is an inch to the right and an inch above the first hole. Both of those holes penetrate the brain cavity. A third hole is approximately 5 inches directly below the first hole. A fourth hole is approximately 2 inches down and 3 inches to the right of the first hole. The last two holes penetrated approximately ½ an inch into the skull.</p>

M47494+P47494+V47494	South 40 Farms, LLC	12/7/2021	<p>On 12/07/21 at 0915 hours while performing antemortem on 7 beef at the outside pen 1, the following noncompliance was observed with HATS Category IV, Antemortem Inspection.</p> <p>A wire panel attached to a metal gate had a broken wire protruding from the panel with a large amount of hair presumably from the cattle attached to it. Since the broken and protruding wire may cause injury or pain to the animals, this is a noncompliance with 9 CFR 313.1(a).</p> <p>Owner: Mr. John Roswech was verbally informed of the noncompliance and that a NR would be issued.</p> <p>The establishment immediately repaired the wire panel.</p> <p>No verbal preventative measures were proffered by the establishment to prevent the reoccurrence of this noncompliance.</p>
