## HAVE YOU SEEN THIS CAT?

**EVERY YEAR, MORE THAN 10 MILLION CATS, PIGS, FROGS, AND OTHER ANIMALS ARE KILLED FOR CLASSROOM DISSECTION.**

Most cats on the dissection tray were purchased from shelters, where they were waiting for a new home after having been lost or surrendered. Some cats sold for dissection are strays picked up off the street, stolen from people's yards, or bred in warehouses, where they are often caged in filthy conditions and eventually thrown into gas chambers to be killed.

**THIS DOESN'T HAVE TO HAPPEN.  
CHOOSE NOT TO DISSECT.**

There are lots of modern, humane alternatives—like computer simulators and models—that spare animals, are more effective at teaching students, and save schools time and money.

## HAVE YOU SEEN THIS PIG?

**EVERY YEAR, MORE THAN 10 MILLION CATS, PIGS, FROGS, AND OTHER ANIMALS ARE KILLED FOR CLASSROOM DISSECTION.**

Baby pigs who end up on the dissection tray often come from slaughterhouses in which they're cut out of the wombs of their slaughtered mothers.

**THIS DOESN'T HAVE TO HAPPEN.  
CHOOSE NOT TO DISSECT.**

There are lots of modern, humane alternatives—like computer simulators and models—that spare animals, are more effective at teaching students, and save schools time and money.

## HAVE YOU SEEN THIS FROG?

EVERY YEAR, MORE THAN 10 MILLION CATS, PIGS, FROGS, AND OTHER ANIMALS ARE KILLED FOR CLASSROOM DISSECTION.

Before frogs end up on the dissection tray, they're snatched out of their homes in nature, disturbing families and ecosystems, then held and transported in filthy, cramped living conditions and finally killed.

THIS DOESN'T HAVE TO HAPPEN.  
CHOOSE NOT TO DISSECT.

There are lots of modern, humane alternatives—like computer simulators and models—that spare animals, are more effective at teaching students, and save schools time and money.
