Dear Registrant,

The enclosed APHIS Form 7060, "Official Warning, Violation of Federal Regulations", is being issued to you for alleged violations of the Federal Animal Welfare Act. This notice is being issued at this time as a serious warning that if you fail to comply with the requirements of the Animal Welfare Act in the future, this citation and all past and future documented violations will be used to justify a more severe penalty.

The Animal Welfare Act provides for penalties of up to \$3,750 per violation.

If you have any questions regarding this citation or the Animal Welfare Act, please contact this office at the address or telephone number above.

Sincerely,

Robert M. Gibbens, DVM
Director – Western Region
USDA, APHIS, Animal Care

OFFICIAL WARNING VIOLATION OF FEDERAL REGULATIONS	CASE NO.
	VIOLATOR Oregon Health & Sciences University 92-R-0001 Site 002
	ADDRESS <i>(Street, City, State, Zip Code)</i>
	3181 SW Sam Jackson Park Rd., #L335 Portland, OR 97239

The Department of Agriculture has evidence that on or about October 28, 2008, you or your organization committed the following violation of Federal Regulations:

2.33(b) – Failure to maintain a program of adequate veterinary care that includes: (2) appropriate methods to prevent, control, diagnose, and treat diseases and injuries, (3) appropriate daily observation of animals and timely and accurate communication of information on problems of animal health, behavior, and well-being to the attending veterinarian, (4) appropriate guidance to principal investigators and other personnel, and (5) adequate pre-procedural and post-procedural care.

2.38(f)(1) – Failure to handle animals in a manner that does cause trauma, overheating, excessive cooling, behavioral stress, physical harm, or unnecessary discomfort.

Titles 7 & 9 Code of Federal Regulations were promulgated to help prevent the spread of animal and plant pests and diseases and assure the humane treatment of animals. Since violations of the regulations can have serious and costly impact detrimental to the public interest, you are warned of this violation. Any further violation of these regulations may result in the assessment of a civil penalty or criminal prosecution. If you have any questions concerning this warning or violation, please contact the listed APHIS Official.

INSPECTION REPORT

Customer #: 1046
Certificate #: 92-R-0001

Site #: 002

Oregon Health & Sciences University

Site Name: 002
West Campus/ONPRC

3181 SW Sam Jackson Park Rd. #L335
Portland, OR 97239

INSPECTION
Type: Routine
Date: 28-29 OCT 2008

"Sec. 2.33 Attending veterinarian and adequate veterinary care.

(b) Each research facility shall establish and maintain programs of adequate veterinary care that include:

(2) The use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries, and the availability of emergency, weekend, and holiday care;"

A baboon, 26249, had surgery as part of a research protocol. On necropsy as part of that protocol, a previously identified abdominal mass turned out to be a surgical sponge. The animal had been monitored due to the mass and weight loss, but had no other symptoms noted.

Prior to the time of this inspection, the IACUC reviewed the protocol and made recommendations to the investigators and veterinary staff to minimize the chances of recurrence.

" (3) Daily observation of all animals to assess their health and well-being; Provided, however, That daily observation of animals may be accomplished by someone other than the attending veterinarian; and Provided, further, That a mechanism of direct and frequent communication is required so that timely and accurate information on problems of animal health, behavior, and well-being is conveyed to the attending veterinarian;

(4) Guidance to principal investigators and other personnel involved in the care and use of animals regarding handling, immobilization, anesthesia, analgesia, tranquilization, and euthanasia; and

(5) Adequate pre-procedural and post-procedural care in accordance with current established veterinary medical and nursing procedures."

INSPECTION REPORT

Customer #: 1046
Certificate #: 92-R-0001

Site #: 002

Monkey 16212 died as a result of sepsis resulting from prolonged labor and fetal demise. The researcher did not recognize the signs of distress and, therefore, failed to communicate with the veterinarian in order to provide timely care to the animal.

Prior to the time of this inspection, the IACUC reviewed the incident and set up a plan including additional training to ensure such a failure does not recur. Neither the primary nor the co-investigator are involved in animal research at this time.

“Sec. 2.38 Miscellaneous.

(f) Handling. (1) Handling of all animals shall be done as expeditiously and carefully as possible in a manner that does not cause trauma, overheating, excessive cooling, behavioral stress, physical harm, or unnecessary discomfort.”

In November of 2007, a laparoscopy was performed on the cagemate of the intended subject. Prior to the time of inspection, the incident was reported to the IACUC and corrective measures had been instituted.
