

UNITED STATES DEPARTMENT OF AGRICULTURE
ANIMAL AND PLANT HEALTH INSPECTION SERVICE

CASE NUMBER:
OR160007

OFFICIAL WARNING
VIOLATION OF FEDERAL REGULATIONS

VIOLATOR:
Oregon Health & Science University
Customer # 1046
Registrant # 92-R-0001

ADDRESS (Street, City, State, ZIP Code):
3181 SW Sam Jackson Park Rd., #L335
Portland, OR 97239

The U.S. Department of Agriculture has evidence that on or about the date(s) listed below, you or your organization committed violations of the following sections of the Code of Federal Regulations, Title 9:

Date(s): January 14, 2016

§ 3.80(a)(2)(ii) Primary Enclosures.

Primary enclosures must be constructed and maintained so that they protect the nonhuman primates from injury.

The above is not intended to be an all-inclusive list. Please know that you are responsible for ensuring that your facility, animals, and property are in compliance with the Animal Welfare regulations. Inspection reports can be found on APHIS' website at:

<https://acisearch.aphis.usda.gov/LPASearch/faces/Warning.jspx>

The Animal and Plant Health Inspection Service (APHIS) created federal regulations to ensure the welfare of animals and help prevent the spread of animal and plant pests and diseases. Since violations of the regulations can have serious and costly impacts that are detrimental to the public interest, APHIS is providing you with an Official Warning for the violation(s) described above. Any further violation of these federal regulations may result in the assessment of a civil penalty, criminal prosecution, or other sanctions. If you have any questions concerning this Official Warning or violation(s), please contact the APHIS official listed in this notice.

Type: ROUTINE INSPECTION

Date: Jan-14-2016

3.80 (a) (2) (ii)

PRIMARY ENCLOSURES.

The IACUC minutes dated 10/20/2015 include discussion regarding an animal that died as a result of entrapment associated with a chain securing an enrichment device. It was found that a device with an obsolete design had been used in the animal s primary enclosure. That device had enough unprotected chain length for an entrapment accident to occur. Immediate changes to the enrichment plan were to include fastener length in the maximum chain length left unprotected by a PVC sleeve, and to make the enrichment storage area accessible to only the behavioral sciences group to ensure that only approved toys and other enrichment devices are dispensed for animal use.

Environmental enrichment is an important part of housing non-human primates. Design of enrichment devices must involve careful scrutiny for safety for use with these animals; they can cause harm if not carefully constructed and monitored with use to ensure they have not become unsafe.

The facility must ensure that all enrichment devices are safely constructed and maintained in order to protect the non-human primates from injury. This NCI was corrected prior to the time of inspection.

A progress report on the comprehensive alopecia study was reviewed.

The inspection was conducted by Drs. Gwynn Hallberg and Heather Cole on January 12-14, 2016 and was accompanied by facility personnel. The exit briefing was conducted on 1/14/2016 with facility personnel.
