

### Inspection Report

UNIVERSITY OF ILLINOIS AT CHICAGO  
BIO RSCS LAB, 1840 W. TAYLOR ST, M/C 533  
CHICAGO, IL 60612

Customer ID: **599**  
Certificate: **33-R-0018**  
Site: 001  
UNIVERSITY OF ILLINOIS AT  
CHICAGO

Type: ROUTINE INSPECTION  
Date: 10-APR-2023

**3.83 Critical**

**Watering.**

\*\*During a review of animal records it was noted that on 6/15/2022 at approximately 3:30 p.m., an 11 year old female baboon, #PA9308, was found to be in distress in the enclosure. The animal was exhibiting open mouth breathing, moderate ataxia and appeared to be severely dehydrated. Treatment was initiated for a period of 5 days, however, due to an increase in severity of clinical signs, the animal was euthanized. The cause of dehydration was determined to be a water valve malfunction. Potable water should be provided in sufficient quantities to the non human primates housed in the facility. It is the responsibility of the facility to ensure that potable water is provided in sufficient quantities to the animals housed at the facility as set forth in this section.

Correct from this date April 10, 2023

**3.129(a) Critical**

**Feeding.**

\*\*Four naked mole rats were found deceased in their enclosures on August 3, 2022. No food was found in the animal enclosures. Necropsy findings indicated the animals did not have access to food. Animals should be fed on a daily basis in order to maintain the health of the animal. It is the responsibility of the facility to ensure the animals are being fed
