

Inspection Report

University Of California- Davis
One Shields Ave
Davis, CA 95616

Customer ID: **9192**

Certificate: **93-R-0433**

Site: 001

UNIVERSITY OF CALIFORNIA, DAVIS

Type: ROUTINE INSPECTION

Date: Jun-05-2013

2.31 (c) (7) **REPEAT**
INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

(c) IACUC functions. With respect to activities involving animals, the IACUC, as an agent of the research facility, shall:

(7) Review and approve, require modifications in (to secure approval), or withhold approval of proposed significant changes regarding the care and use of animals in ongoing activities.

Several changes had been made to the activities being conducted under one protocol without the approval of the IACUC.

Oxygen saturation was not monitored at all, monitored sporadically, or not maintained at levels specified by the protocol in several animals.

Protocol changes of this type can have a significant impact on animal well-being and require approval by the IACUC prior to being instituted. A system should be in place which would ensure that proposed significant changes to activities involving the care and use of animals are reviewed and approved by the IACUC prior to their implementation.

Previous correction date: Corrected.

An exit briefing was conducted with a facility representative.
Accompanied by Dr. P. Smith.
This inspection was focused on protocol review.
