Type: ROUTINE INSPECTION
Date: 05-SEP-2023

3.6(a)(2)(ii) Critical

Primary enclosures.

On 17 October 2022, beagle #22C0440 was found dead and beagle #22C0435 was found with injuries. The beagles were each housed in compatible groups of 4 in primary enclosures that were next to each other. The two kennels were separated with a kennel divider that had been secured with a chain due to a broken latch. The kennel divider secured with the chain allowed enough give to create enough space for beagle #22C0440 and beagle #22C0435 to come in contact to fight, resulting in injuries to each dog. In addition, beagle #22C0440 become caught in the space under the kennel divider resulting in death. Securing the kennel divider with a chain did not maintain the primary enclosures in good repair to prevent injuries, resulting in the death of one dog and injuries to another. Ensure that all primary enclosures are kept in good repair to prevent injuries to animals. Corrected prior to inspection.

This inspection and exit interview were conducted with Facility Representatives.

End of report.
