

DID YOU KNOW

you have the right to

refuse to dissect animals

in New Mexico?

It's true! Each year, countless animals (including frogs, cats, and birds) are cruelly killed and then cut up in classrooms across the country—even though humane methods exist. Studies have shown that students who use humane dissection methods perform just as well as—and often better than—students who cut up animals. You don't have to dissect! Explain to your teacher that you won't and that a policy gives you the right to say NO to doing so in New Mexico. This is what it says:

2005 State Board of Education Policy

All science classes that include dissection activities as part of the curriculum shall provide virtual dissection techniques as alternative activities for any student who is opposed to real dissections for ethical, moral, cultural or religious reasons. Alternative techniques shall approximate the experience of real dissection activities as closely and appropriately as possible. A virtual dissection technique means carrying out dissection activities using computer two-dimensional or three-dimensional simulations, videotape or videodisk simulations, take-apart anatomical models, photographs, or anatomical atlases.

Animal dissection is unnecessary and cruel. Exercise your rights and stand up for animals by choosing not to dissect them. For more information or to get involved, visit CutOutDissection.com or e-mail us at hello@peta2.com.
