

DID YOU KNOW

you have the right to

refuse to dissect animals

in the Northwest Territories?

It's true! Each year, countless animals (including frogs, cats, and birds) are cruelly killed and then cut up in classrooms across the country—even though humane methods exist. Studies have shown that students who use humane dissection methods perform just as well as—and often better than—students who cut up animals. You don't have to dissect! Explain to your teacher that you won't and that a law gives you the right to say NO to doing so in the Northwest Territories. This is what it says:

Consolidation of Education Act, SNU 2008, c 15

[O]bserve the principal features of a mammalian brain, eye and ear, using models, computer simulations or dissections, and identify the major structures of those organs.
