Fun and Fascinating Facts About Pigeons!

Here are some facts about pigeons that are sure to wow your students while deepening their respect and appreciation for these fascinating birds. You can read the following introduction and interesting facts aloud, asking students to remember their favorite fact so that they can share it with you or a classmate. You can also ask the follow-up questions to encourage students to think about pigeons’ activities, thoughts, and feelings. This fact sheet pairs well with the book How to Heal a Broken Wing by Bob Graham, TeachKind’s “Be a Pal to Pigeons” activity bundle, PETA Kids’ “Did You Know? All About Pigeons!” video, and the PETA Kids Pidgey plush.

Did you know that pigeons are intelligent individuals who belong to the same family as doves? People tend to call smaller species “doves” and larger species “pigeons,” but there’s actually no real difference between the two. Here are some other interesting facts about these quirky birds:

• A pigeon’s navigational skills are astoundingly complex, and they can fly up to 50 mph and can travel up to 500 miles in one day.
• Pigeons have excellent hearing and vision, and they see in ultraviolet color.
• Pigeons drink water by using their beaks like straws.
• A female pigeon is called a “hen.”
• Pigeon babies are called “squabs” or “squeakers.”
• Pigeons choose a life partner and are devoted to their families, with both parents caring for their young.
• Pigeons flock in large numbers to stay safe from danger.
• Pigeons can recognize themselves in puddles and mirrors.
• Pigeons have excellent memories.

Follow-Up Questions
• Pigeons can fly up to 500 miles in one day. Where do you think they go? Where would you go if you could travel that far in a day?
• What do you think pigeons think when they see themselves in puddles or mirrors?
• Pigeons have excellent memories. What things do you think they remember? Maybe their parents or the nest where they hatched?
Craft: Make a Pigeon Pal!

Materials Needed

| Pigeon cutout template | Scissors | Purple, green, gray, orange, and black crayons, markers, or colored pencils | Glue | 1 googly eye |

Instructions

Your students will be making a rock pigeon, the most common type of pigeon in North America. You can show them the image above for inspiration and then have them color and assemble their own pigeon pal following the steps below.

1. Color the shapes on the pigeon cutout template:
   a. Use green and purple to color the neck.
   b. Color the rest of the body gray.
   c. Color the tail feathers gray.
   d. Color the wings gray and the wing bands black.
   e. Color the beak dark gray.
   f. Color the feet orange.
2. Cut out all the shapes.
3. Glue the tail feathers on.
4. Glue the wing on.
5. Give the bird a face by gluing the googly eye and the beak on.
6. Glue the legs and feet on.
7. Let the glue dry.
8. If you’re using the “Be a Pal to Pigeons” activity bundle, students can complete the “My Pigeon Pal!” worksheet and color in the background. If not, you can have them complete the sentence “I can help pigeons by …” on a blank sheet of paper.
9. Students can attach their paper birds to their worksheet or piece of paper so that you can display them.
Cut out these shapes to make your pigeon pal!
