UNIVERSITY OF CALIFORNIA,
BERKELEY

Type: ROUTINE INSPECTION

Date: 11-SEP-2023

2.31(d)(1)(ix)

Institutional Animal Care and Use Committee (IACUC).

During inspection of vole enclosures on 9/11/23, veterinary medical officers noted that an animal that had undergone surgery on 9/8/23 did not have the prescribed post operative monitoring documented on the surgical card as described in the animal use protocol. The protocol states that, "post-procedure monitoring will be noted on the surgical card placed on the front of the cage card for daily checks for at least 3 days." The surgical card did not have the post procedural monitoring documented for 9/10/23. Without this documentation, the condition of the animal is unknown, as is whether or not the animal received additional analgesic medication that could have relieved unnecessary suffering, pain, and distress. On 9/11/23, vole m338f was found deceased in the cage, and the resulting cause of death was noted to be due to dehiscence of the surgical site, a described potential surgical complication noted within the approved animal use protocol. Activities that involve surgery include appropriate provision for pre-operative and post-operative care of the animals in accordance with established veterinary medical and nursing practices.

Correct by 14 September, 2023

This inspection and exit interview were conducted with Attending Veterinarian & staff.

Additional Inspectors:

William Campbell, VETERINARY MEDICAL OFFICER
