#### 2.77(b)

##### Records: Carriers and intermediate handlers.

During inspection, records review identified that two shipments of nonhuman primates did not maintain a record of the health certificate issued by a licensed veterinarian for shipments dated 8 January 2025 from Louisiana to Nevada and 29 January 2025 from Florida to Maryland.

USDA regulation requires that the accepting carrier or intermediate handler shall keep and maintain a copy of the health certificate completed as required by 2.78, tendered with each nonhuman primate transport.

Correct by 23 February 2026 for all future nonhuman primate shipments.

#### 3.90(a)

##### Care in transit.

During records review, an animal health observation log did not indicate that the animals transported from Texas to Louisiana were observed at minimum once every 4 hours during transportation. The original record indicated two checks at 9AM P/T (11 AM in Central time) on 3 December 2025 and 6:20 AM (Central time) on 4 December 2025. The registrant contacted the driver, who confirmed a weather delay in loading/unloading but the requirement is still to observe the animals no less than every 4 hours.

Correct by 23 February 2025 and for all future transportation of nonhuman primates.

This inspection and exit interview were conducted with the registrant.
